## SKILLS

- Complex problem-solving
- Logical and structured thinking
- Analytical skills and decision-making
- Leadership and team coordination
- Task organization and time management
- Adaptability to new technologies
- Proactivity and self-learning
- Quality-oriented mindset
- Creativity applied to tech solutions
- Effective communication in technical environments
- Experienced in creating Use Cases, User Stories, and executing comprehensive testing plans.

## TECHNICAL SKILLS

- Frontend:** React, Vite, JavaScript, TypeScript, CSS, Tailwind.
- Backend:** Node.js, NestJS, Prisma, APIs REST, C++, Java, C#.
- Databases:** PostgreSQL, MySQL, SQL Server, Supabase.
- Tools & IA:** N8N (Automation), Git/GitHub, Docker, Cursor, Antigravity, Google Cloud.
- Office Suite:** Microsoft Excel, Word, PowerPoint (Advanced).

## LANGUAGE

- Spanish:** Native
- English:** B2 Level (Fluent)

## SUMMARY

Motivated Systems Engineering student with a passion for technology, analytical thinking, and teamwork. Experienced in developing scalable solutions and eager to grow in dynamic environments.

# Julieta Sleiman

## Systems Engineering Student, 22 years old

Dedicated and innovative 5th-year Information Systems Engineering student with a strong passion for solving complex problems through technology. I possess proven full-stack development experience, from database design to frontend deployment. My background as an IT Consultant for IoT projects, combined with my recognized analytical thinking, attention to detail, and innate leadership, allows me to bridge technical execution with strategic vision. Confident, dedicated, and eager to contribute to multi-disciplinary teams in data-driven environments, QA, or advanced software engineering challenges.

## EDUCATION

### Information Systems Engineering Student

National Technological University - Tucumán Regional Faculty (UTN-FRT)

- 2022 – Present (5th Year)
- Academic Excellence:** GPA: 7,82/10.
- Degree Progress:** 76,7% completed (33/43 subjects approved).
- High academic performance (majority of subjects passed with grades between 7–10)
- Strong background in software engineering, data analysis, and systems design

### High School Diploma in Natural Sciences

Vocational Institute of Concepción

- 2016 – 2021
- GPA:** 9.40/10 (Ranked 3rd best GPA of the graduating class).
- Honors:** National Flag Bearer (National Flag Escort).

### English Institute

- B2 Level (Strong communication skills in speaking, reading, and writing)
- Studied English for over 7 years at Oxford Institute
- Additional training at Aticana with certified (2021)

## PROFESSIONAL EXPERIENCE

### IT Consultant & Systems Analyst (Independent)

Chez Hotel Establishment | Dec 2025 – April 2026

- Analyzed operational processes for guest entry and internal control.
- Designed a technological solution for vehicle access auditing using Smart IP Cameras and sensors.
- Implemented CCTV systems with vehicle detection and remote monitoring integrated with mobile apps.
- Advised on network infrastructure for IoT devices and security.

### Full-Stack Developer

2025 – Present

- Albina E-commerce:** Developed a responsive online store using React, Vite, and Tailwind CSS, including a dynamic catalog and shopping cart.
- Camilly Bakery:** Designed a high-conversion landing page for a commercial bakery.
- Telegram Chatbot:** Built an automated bot using n8n, PostgreSQL, and OpenAI models, deployed on Hostinger.

## COURSES & CERTIFICATIONS

- Linear Programming & Operations Research:** Udemy (March 2026).
- n8n: No-Code AI Agent Creation:** Udemy (2026).
- Video Game Development:** UTN FRT (2025).

## ACADEMIC PROJECTS & RESEARCH

- CONAISI 2025 Speaker:** Invited to present "Waste Collection and Classification Model at the Pachamama National Festival," a field research project for Operations Research.
- Medical Emergency System (Triage):** Developed an integral hospital guard system in Java using Scrum methodology, focusing on iterative Sprints and incremental delivery.
- Gym Management System:** Built a modular management software using C++.
